Comments: To Whom It May Concern,
The importance of the quality of the river is clear and substantial to every aspect of my life, and the lives of every person I know. I object in every single way to any mining and/or continuation of the Stibnite Mine and plead you to take action into its discontinuation. Please, for the quality of life of so many people, as well as the quality of life of this world that we live in, do NOT move any farther with this project. Thank you and I beg you listen to the people who are telling you to stop.
