Comments: As an Idahoan and fisheries advocate, I am against the proposed project through Perpetua Resources. The headwaters of the East Fork South Fork provide some of the best spawning and rearing habitat for bull trout, Chinook salmon, and other imperiled fish. Losing a percentage of this habitat would be devastating to the populations.

As someone who has fished, surveyed, and snorkeled the SF drainage extensively, I can confidently say these resources are too precious to risk to development and extraction.

Thank you for your consideration.
