Comments: The Stibnite Mining project SHOULD NOT be permitted. The environmental, ecological and societal damages that would occur from the stibnite mine are far too great to be justifiable and the stated reclamation is far too little. Please DO NOT allow the Stibnite mine. The South Fork Salmon River is far too rich of a resource to lose. We need to protect it for future generations. I want my son to be able to backpack or boat the river and catch fish or be able to hunt the area and the Stibnite mine would drastically and permanently wreck the area. Please vote NO!
