Comments: I am opposed to this mining Project. Mining in this area will further degrade the area, how many times do we need to have environmental destruction done to learn from it. There is just no way to avoid leaching into the rivers and streams, tailing ponds eventually fail, they and their chemicals and elements are there in some form forever, long after the mining company is gone
I also have a home in the Warm lake area and the traffic load on the roads will be very impactful.
with all the truck hauling loads over the summit the traffic will be backed up behind the trucks hauling ore for miles on Both the /Cascade and Warm Lake side, there is no way around it. A half hour trip will be doubled, instead of of a pleasant drive it will a bumper to bumper slog not to mention the exhaust contamination in an otherwise clean environment . it will become an industrial zone
