Comments: Dear US Forest service,
It pains me to be having to write this message as an 18 year old kid in 2023. The south fork of the salmon river holds an extremely important place in my heart along with the hearts of many others. The expansion this mine will destroy over 100 miles of wet lands and wildlife. In this day we do not need to be mining especially areas that should be protected till humans no longer walk this earth. Keep the Salmon wild!

Yours truly,
Mac Wirth
