Comments: To whom it may concern,
I oppose stibnite mine and I'm concerned that it will most definitely cause irreversible damage to our community, land, and wildlife. It threatens the salmon river drainages, wintering wildlife on the South fork.

Any accidents by this foreign mining company will tap Valley county's emergency services leaving community members in danger to not get care they need. Carrying hazmat along the nearly 70 miles of river roads endangers clean water and public safety.

Allowing this mine to proceed is an attack on our community and our public lands.
