Title:

Comments: I urge to choose the No Action proposal for this project. I am concerned about the negative impacts to my community, especially the increased traffic on our local roads such as Lick Creek road and risk of accidents. Our community already struggles to find adequate housing for working people, our roads are already congested, and the last thing we need is out of area industry coming in for short term profits. Please consider the local residents of our area and the threats this project brings to our long term quality of life.

Thank you.
