Comments: As you all know, salmon river is our last large volume free flowing river in America. The government has dammed up all our river and polluted them with mining chemicals and harsh metals. Even if it is "green" it's not. Please think about the nature and future of this river. As a society we seem to be moving in the right direction for conservation, but this mine will be a big step back. Please protect our rivers, our land, our people, and our future. Also if non of you guys have ever been on a rafting trip down the salmon, contact me and I'd love to show you all why this river is so special and needs to be left alone and enjoyed by the people. Seriously call me if you want to go rafting.
