Comments: Dear Forest Service,

Please respect the intrinsic rights of our forests and rivers. Like many, I don't believe that the stibnite mine project will have any positive outcomes for our planet or our rivers that we value highly. It is inevitable that this project will hurt our planet our rivers and our mother earth. Please make a decision that respects the rights of nature. We've all seen enough. We know the damage that future extraction projects will have on our Earth. Thank you for considering the voices of the people that overwhelming vote against this terrible project.
