Title:

Comments: Stibnite Mine will pollute the river, grossly effecting the surround plants and animals that depend on it. Stibnite Mine would also intrude on Nez Perce hunting and fishing territory, which would break a 168 year-old treaty. Gold has a history of contaminating water and allowing trespass on indigenous lands. Now is an opportunity, well within The Forest Service's power, to stop it.

As an Idahoan who has roots going back 5 generations, I am against Perpetua Resources Project to build Stibnite Mine.
