Comments: As a frequent user of the outdoors and lover of the state of Idaho I would like to take my part in requesting that the Stibnite Mine and its operations are brought to a halt and that proper time and resources are put into cleaning up. I have lived in Colorado for several years and seen first hand the long lasting damages of having mines near valuable water sources. I hope ghat my one small voice can be taken in to consideration with others that have spoken up about the matter. Thank you for your time.
