Title:

Comments: Close the mine and protect our environment! Humans ought not to put ourselves above other members of our ecosystem, whether you value one life over the other or not, mining takes the lives of precious and beautiful animals, such as our salmon friends who have had first claim on their spawning grounds since time immemorial. And for what? We don't need to mine here to live? The salmon ask us to think larger than ourselves, larger than our current situation. Can we?
