Title:

Comments: I am writing in reference to the Stibnite Gold Project and the risks that are associated with said project. The Stibnite Gold Project puts not only the famed Frank Church-River of No Return Wilderness at risk, but also the East Fork of the South Fork of the Salmon River and endangered species such as salmon, steelhead, and bull trout. Those animals are inherently deserving of protection, and serve important roles in their ecosystems and the cultures of many native folks. The last thing this area needs is more toxic mining and associated impacts, and I respectfully request that the Forest Service deny the permit for Perpetua Resource's Stibnite Gold Project and require Perpetua to finish cleaning up the mine site.
