Title:
Comments: I am not in favor of the Perpetual Resources Stibnite Gold Project unless there is more information and analysis.
What is the actual route that mine trucks will take, what is the number of trucks, and what is their load, and how will they be required to cut down on flying debris which adds to climate problems and air quality.
Regarding air quality, what will the level of arsenic or other harmful substances be, how will this be monitored and what actions will be taken to control this.
How will this project impact other streams in the area and how can streams be recovered faster?
