Comments: The last thing this area needs is more toxic mining and associated impacts. The Stibnite Gold Project puts not only the famed Frank Church-River of No Return Wilderness at risk, but also the East Fork of the South Fork of the Salmon River and endangered fish species. In addition to toxic chemicals being released into this wilderness area, road construction and mining operations would cause serious impacts to the River of No Return Wilderness, including noise audible from a nearly 2-mile radius, wildlife disturbance and displacement, increased access to and activity in what are now quiet and lightly-visited places in the Wilderness, and sediment pollution in streams within the Wilderness. The Forest Service needs to deny the permit for Perpetua Resource's Stibnite Gold Project and require Perpetua to finish cleaning up the mine site.
