Comments: The area around Yellow Pine is such an amazing place. I enjoy fishing Johnson Creek and the MF and SF Salmon. Why not pay people to restore what has been done to the area instead of extracting. It's tiring to think all we do is take and then promise the area, its waters will be fine. No accidents will occur. It's safe to say we are our worst enemy when it comes to making promises that everything will be fine. Clean up what has been done and don't continue to extract and alter. Give the habitat for fish and wildlife a break. Thanks
