Title:

Comments: I am an avid recreationalist that frequents the South Fork of the Salmon as well as lives down stream on the Main Salmon watershed. I have many concerns regarding the mine and the overall environmental impact it will cause. I would like the following questions answered.

1.Can they guarantee that the watershed will be 100% free of mine waste?

2.How does Perpetua plan to address treaty violations?

3.What effect will the mine have on the Bulltrout?

4.What effect will the mine have on the Chinook?

5.What will the long-term effects of Burnt Log Road have on the environment and the habitat fragmentation?

6.Will wolverines be impacted by the habitat fragmentation?

7.What analysis has been done on for the increase of transportation on Hwy 55?

I do not approve the mine. Pick the No-Action alternative.
