Comments: Thanks for the chance to comment. I oppose the proposed Stibnite mine as I believe that it will eventually degrade water quality, despite assurances and supposed preventative measures employed. Our waterways are too precious to gamble on this company cleaning up their mining waste. History tells us just the opposite, and as a Republican by political choice, I'm not willing to pay, with my tax dollars, another multi billion dollar clean up of mining waste on the public's tax burden.
