Comments: To Whom it May Concern,

I am writing to express my opposition the Stibnite Gold Project proposed by Perpetua Resources. The current proposal does not adequately address the threat to fisheries, water quality, and the environment that additional mining in the area would inevitably cause. The current roads are inadequate for transporting the hazardous materials resulting from mining activities, and constructing additional routes would result in additional disturbance to the ecosystem. Thus, I support the "no action" alternative.

Thank you for you time.
