Comments: I am concerned that the Stibnite Mine will significantly negatively impact the East Fork South Fork of the Salmon, and the risk of accidental spillage of truck freight could significantly impact the many miles of wild lands from the mine site to the next freight point. Such level of impact that is being proposed is too great, where even a slight percentage of negative impact would account for significant damage. The time for the Stibnite Mine has passed. I urge the USFS to at a minimum consider more mitigation. However, I feel that the mine should not be able to proceed, given the proposed level of impact.
