Comments: Hi,
I am opposed to the Stibnite mine project. I feel the risks to the unique South Fork Salmon river are too great. I've been through this river corridor a few times and feel it is worthy of protection. In another state, this area could be a national park. Having lived in Idaho my whole life, I've seen a number of places where mining has decimated the environment. It would be a mistake to allow that to happen here.
