Comments: A Gravel Mine and Rock Crushing operation smack dab in the middle of a planned Mountain Bike Trail system on Jackson Mountain? NO!

** The proposed site is only 1900 ft from the nearest homes in San Juan River Village! ** NO!

** A 25 Ton Dump Truck on Jackson Mountain Road Every 24 minutes! ** NO!

** Mountain Bike Recreation and Dump Trucks Don't Mix! ** NO!

With over 1,000,000 acres of San Juan National Forest, we (San Juan River Village residents) cannot understand why this site that is so close to homes, was chosen in the 1st place!

SJRV representatives have provided Archuleta County BOCC five high priority alternate sites for consideration that fall into the geological / geographical preferences they outlined, as well as limits use of USFS roads (County roads already designed for large, heavy load trucks) as well as low-density residential consideration. Do not place this mine in the current proposed location on Jackson Mountain, adjacent to SJRV!
