Comments: I am writing in opposition to the proposed Jackson Mountain gravel pit. While I'm very supportive of the forest services plans for mountain bike trails, fire mitigation, and forest improvement, I am against the proposed Jackson Mountain gravel pit. This proposed gravel pit is too close to the San Juan Village subdivision, and presents some very negative realities including water degradation, decreased air quality, negative impacts on wildlife, and water degradation. I understand, the Forest service and Archuleta County's need for gravel, I feel that there are less impactful locations. Please do not put a gravel pit on Jackson Mountain.

Sincerely,

Harold Jaeke
