Comments: Jackson Mountain, near the town of Pagosa Springs, is a locally treasured recreation area. Some of the many activities available on Jackson Mountain include hunting, hiking, mountain biking, cross country skiing and snowmobiling. The Forest Service has been working on fuels and vegetation management and has plans for a new Mountain Biking trail system well underway. I believe these plans are appropriate for a recreational area near a neighborhood.

I do not believe that a gravel pit is compatible with recreation on Jackson Mountain. I sincerely hope that the Forest Service can find a better location for a gravel pit.
