Comments: Wow , what an amazing use of our PUBLIC LANDS. This is the best way to utilize and take care of the health of both the land and its inhabitants. This was the intent of setting aside these types of lands for the healthy use for future generations. Unfortunately there is a small group of land users who believe they actually have more rights to this land than the rest of the entire United States of America. I appreciate what ranchers do to help bring food to the market, but if you don't own your own land you should be grateful for the fact that you can rent and lease our PUBLIC land for a ridiculously ancient fee. This is a win , win proposal for the area and its inhabitants people, animals and the landscape will all benefit.
