Comments: I believe a new visitor center needs be located closer to the Glacier active face and on the West side of the Glacier. I believe this location is best as it gets the majority of the new construction out of the wet lands, will provide many years of Glacier viewing from a location closer to the face of the Glacier for which the Mendenhall Glacier is famous, and have less wildlife impacts.

All the alternatives I have seen so far just band aids the majority of the current problems.

The current parking facility was sited 100 yrs ago +/- and the current visitor center was sited 65 to 75 yrs ago, when when the number of visitors was much smaller.

I am sure the existing visitor center could be used some of park's uses, weddings, meetings, ect.
