Title:

Comments: This SEIS allows MVP to break 11 Forest standards or rules to accomodate this energy project. This would set a dangerous precedent. This project runs against the public interest and against the USFS overarching mandate to protect our National Forests. MVP has produced constant environmental violations during construction. MVP has constantly minimized the environmental impacts of this project. The need for the project is unproven. This project is about making money. I live in Alamance County, NC where the MVP Southgate Extension is under way - We are well aware of the tactics which MVP is using to force this project on the public.

Please select Alternative #1 - No Action and reject this project.
