Comments: The trail development aspect of the project sounds great, and I'm in favor of this.

The gravel pit should not be included in this project for several reasons:

- 1) this location is very close to a residential area - noise & dust will have a strong negative impact
- 2) co-locating the gravel pit with the trail system is also a bad idea (dust)
- 3) this section of HWY 160 is already very dangerous - additional traffic from heavy trucks will likely lead to more accidents
- 4) other location options have been provided for the gravel pit that are not close to residential areas - please use one of those
