Title:

Comments: I strongly oppose this project and IF this project passes, regulatory etiquette classes and permits to use it need to be mandated. Just because we can doesn't mean we should. People are destroying these beautiful valley's and the wilderness and disrupting wildlife by not leashing their dogs among many other things. Trash and dog poop is left all over and and I frequently pack out others trash to do my part to preserve this amazing valley. Marble is in a fight to preserve these same concerns and has been for many years. No, no, no! Can we please do everything thing we can to preserve what is left of this beautiful valley, please. The wildlife would agree.
