Comments: As a homeowner in the San Juan River Village, I am adamantly opposed to the proposed gravel pit that's only 1900' from homes.

This gravel pit is far too close to a residential neighborhood-- it will destroy quality of life and property values due to increased highway traffic (safety concerns); constant, loud, rumbling truck engines that repeatedly scare pets and wildlife and impair our ability to enjoy our home environs; wildlife will be displaced which endangers the animals; vegetation and the ecosystem will be forever changed; and it will lead to the impairment of planned natural improvements to the area (nature trails, etc.).

Please do not proceed with the gravel pit in this location.
