Comments: My father built his dream cabin in San Juan River Village in 1984 to enjoy the natural beauty of the beautiful mountains, and the lovely pine trees. He sacrificed so much to achieve this dream and built most of the cabin himself! We continue to enjoy the cabin's big deck and we spend hours enjoying the quiet, crisp mountain air. What a travesty if we had to hear the loud motors of gravel trucks all day and every day. I cannot even imagine how anyone could think about ruining this lovely scenic mountain filled with so many personal homes. Please please please - find another location for the gravel pit that is no where near our homes .
