Comments: It is great to see a progress report on the evaluation of the Jackson Mountain project. I strongly support the development of the 40 miles of multi-use trails in the Jackson Mountain area. I would be an active user of the trail network, primarily on a mountain bike but also on foot if the trails permit. I also believe this will be a net positive for the Pagosa Springs area given the forest thinning/fuel reduction efforts that are described in the potential project, as well as drive positive economic impact for the area. Thank you for your time.
