Comments: I am writing in opposition to the proposed gravel pit project on 160 at the San Juan River village. I believe this project would greatly reduce the quality of life we have chosen but I also believe that the amount of trucks in and out of the gravel pit, I believe it will present a true accident hazard having big trucks driving up and down 160 in a residential neighborhood and beyond. As it is people speed all the time on the road.

I do believe the bike trail would be a nice addition to the area.
