Title:

Comments: My name is Myran Copley, a welder in the great Local Union 798. I don't think people truly understand what a great way of life this pipeline would be to not only the workers building the line but also the communities around it. The towns these lines are built around flourish. Whether it's the laundromat where 100+ workers wash their clothes each week, the mom and pop diners in town where we eat, or maybe even the car washes where we clean our trucks. The building of these pipelines have endless possibilities and help out a lot more than the workers who build them. Please take that into consideration when debating the ongoing of the Mountain Valley Pipeline.

Thanks, All of us at Local Union 798.
