Title:

Comments: I am against the pipeline development in the National Forest. The National Forest belongs to myself as a citizen of the USA and I personally find the set aside natural area to be the best thing America has done as a society. Humans continue to develop and destroy our natural resources and there's no where to go to enjoy the world as it's supposed to be, healthy and in harmony with nature. Please do not deface what natural lands we have left in the name of development and natural resources consumption!
