Comments: I am deeply concerned about the proposed rock quarry and am steadfastly against it for the following reasons: 1) Our cabin is less than 2000 m away. There will no doubt be noise and dust pollution which no one wants. 2) My family, and my two small children are always hiking back there and playing in that very quarry and and thought of heavy trucks rolling in and out all day long raises serious safety concerns. 3) It is my understanding that bike path development is underway in the same location - again this will be a safety concern. 4) Were plans to go ahead with the gravel pit, there would certainly be a massive scar left in what is now a pristine forest. I do not like this idea and it will most certainly affect the value of my property. I implore you to find other less obtrusive land that will suit your needs. Thank you.
