Comments: Thanks for the opportunity to comment, again, now on the new draft EIS. I support most of the projects to expand and enhance the Mendenhall Glacier Recreation Area. I support expansion of the trail system in the West Glacier, Dredge Lakes and Nugget Falls areas. I support parking enhancements along Glacier Spur road to access trails. I support a bridge connecting Dredge Lakes trails to the Campground, and cabins in the campground. I support a new welcome center located back in the existing bus staging area, away from the main visitor center area. I am concerned about powered boats with many passengers crossing the lake and landing at the toe of an active glacier for safety concerns (aren't we always told to stay away from the toe for safety reasons?), including the safety of existing non-powered boat traffic on the lake.
