Comments: The proposed gravel pit on Jackson Mountain should be denied. This gravel pit will cause more harm to the surrounding communities than any possible good that could come from its operation. I oppose the gravel pit for the following reasons:

- 1) noise pollution from the trucks transporting the gravel,
- 2) increased traffic,
- 3) destruction of precious animal and plant habitat,
- 4) devaluation of nearby properties,
- 5) the existence of better alternative sites for the gravel pit.
