Comments: I have lived in Juneau Alaska since 1970. I live in the Mendenhall Valley, close to the glacier. The glacier area is wonderful in the sense that during the tourism season, hundreds of thousands of people get to spend some time in this awesome area.....and in off season, the glacier is a wonderful place that people in Juneau get to enjoy! My main comments are that I do Not support new "developments" to the area!----that would be no new visitor center, no new paved roads beyond the current ones that exist, no food and beverage facilities, no motorized traffic on the lake! the large parking lot for buses, and the current car parking lots, plus the current visitor center, should be maintained and well looked after, but they should not be expanded!! The rumors of building a new center closer to the glacier, and paving road access beyond current visitor center is absurd! The lake has several options for boating and tourism activities that are just fine the way they are without adding motorized options!! Only motors needed are for possible rescue craft! Not for people to zip around on boats and jetskis!! Juneau has many excellent food and beverage opportunities in the town, we should absolutely not be building any at the glacier! Maintain the Status Quo for the Mendenhall Glacier area! thank you.
