

Data Submitted (UTC 11): 2/2/2023 12:14:12 AM

First name: Doug

Last name: Heiken

Organization: Oregon Wild

Title: Conservation and Restoration Coordinator

Comments: The FIA data are very detailed and granular and can be used to describe the abundance of large trees 20-30" dbh that are most affected by the Screens Amendment. Why is the Adaptive Management process using size classes for large trees that do not align with the policy adopted in the plan amendment?
