Comments: I would highly recommend adding more than 12 parking spots to the new Goodwin Lake trailhead. I would also support more than 22 additional campsites given the massive increase in recreation demand over the past decade. I would also appreciate the inclusion of additional legal dispersed camping spots higher on the road, clustered in close enough proximity to an additional vault toilet to reduce human waste impacts. Although the additional campsites are highly welcome, we have seen a reduction in legal camping opportunities in the Jackson Hole region due to the restriction of camping to numbered dispersed sites in the Curtis Canyon, Toppings Lake, Spread Creek, Buffalo Fork, and Pacific Creek areas. While understanding the difficulties of unmanaged dispersed camping and human waste impacts, this project seems like a good opportunity to add more sites in a responsible manner, to make up for the losses of the past decade.
