Last name: Gebhardt

Organization:

Title:

Comments: Mother Earth is slowly dying,
because of man's insensitivity to the Earth & it's natural ways.

We need to stop cutting down old growth trees,
& grow hemp instead.

Hemp is strong and fast-growing and leaves the old growth forests to do their job of sequestering carbon.

Anything can be made of Hemp!

Please stop cutting down trees.

They the planet's lungs.

Let's save the Earth in all of its green glory, for our children. & grandchildren.

Thank you for your time & attention.
