To the US Forest Service,

Last year, on Earth Day, President Biden asked that logging on old-growth public lands, STOP!

He called for a moratorium on this practice!

The Telephone Gap Forest is 92% old-growth forest and is protected under this jurisdiction!

Although, his executive order is not a mandate it needs to be honored. It stands to reason that our leader had a reason for making this request. That reason is the climate crisis!

Please STOP this destructive behavior!
