Title:

Comments: Dear US Forest Service,

I strongly oppose the Telephone Gap logging project, which targets 11,800-acres of mostly mature and old trees northeast of Rutland, an area larger in size than the City of Burlington."

This massive timber sale would:

Release vast amounts of carbon to the atmosphere!

Endanger the water quality of Chittenden Reservoir due to pesticides!

Introduce invasive species!

Destroy habitat needed by threatened and endangered species!

PLEASE STOP!!!
