First name: Christopher
Last name: Matera
Organization: Massachusetts Forest Watch
Title:
Comments: Please stop these clearcut crimes against the public interest, nature and the truth now.  Cancel this "project", the world will be much better without it.

Logging and Clearcutting National Forests does not serve the public interest, "improve" the the forest and the phony excuses used to confuse and manipulate the public are inexcusable.

Stop the damage and the lies that clearcutting "is needed" to "help" nature now.  The only one you are fooling is yourself.

See these photos of WMNF (which is what you are planning for GMNF) and ask yourself if that is the legacy you want to leave for the world.

https://www.maforests.org/WMNF.pdf

The world can not take any more of such human hubris and delusion.
