Comments: I write today to beg you to consider abandoning the Telephone Gap Integrated Resource Project. For the record, I am a proud Vermonter and a supporter of the timber industry. But this particular 11,000 acres offers significant environmental benefit as we face the changing climate and rising CO2 levels. We need this forest, these trees left standing at this most critical time in human history! Please consider your children and your children's children when you make your decision, knowing that you will have prioritized them and their future by stopping this project.
Thank you.
Maria Ogden
