Comments: Telephone Gap Project - absolute INSANITY! I can't even wrap my head around the Forest Service even considering this , especially at this time. This is an area of prime old growth forest - trees that have been silently and diligently working hard for us undeserving humans by sequestering carbon in addition to providing habitat for species that are already struggling to survive. We should be honoring these trees not cutting them down - and for what, so someone can build a nice table? This project is misguided on sooo many levels and really makes me question the Forest Service as a whole. I stand for the trees.....
