First name: margot
Last name: lasher
Organization:
Title:
Comments: I walk with my dog into the forest every day, and having the forest untouched by humans is so important. It is the home of wild animals, and the home of an incredible number of plants, mushrooms, large old trees, small young trees, and so on. We need to keep this forest as it is, to let it develop in its own way, not our human manufacturing way. Please let the forest alone.
