Comments: To go ahead and log this land will set precedent and pave the way for future destruction of earths resources. The benefits of old growth forest are many and it is important to remember how segmented forests disrupt wildlife. Take a stand, make an effort to preserve the natural world during a time we see many environments on earth being destroyed. Future generations quality of life is in peril. Sure this is one logging project how much damage could it do? The change must start somewhere. The damage done will take 100's of years to replenish. Stop the logging project now! What a beautiful resource we have here in New England, forests, lakes, rivers, mountains. We all benefit from visiting these undisturbed landscapes.
