Title:

Comments: I object to the construction of this trail on several fronts. First, road bikers will most likely continue to use Route 133 due to the surface of the proposed trail. Therefore no enhanced protection for them or motorists is going to occur. Second, sufficient other trails exist for mountain bikers in other areas. Third. although you provide a limited period for the protection of wildlife, herds of elk and deer continue to populate this area during the whole year. This additional stress on the herds is counter productive to maintaining this valuable resource.

I respectfully encourage you to withdraw this proposal. It is determent to the national forest and to the resources therein.
